AutoCAD can be time-consuming and expensive. To simplify the learning process and reduce your investment, we created this guide. We hope you find it useful as you gain your AutoCAD skills. With that caveat, let's get started! On the AutoCAD screen, click on the blue down arrow to the left of the small globe icon, and select "Take a Tour". Autodesk's tour of AutoCAD. The tour starts with an introduction to the software and describes its functions and capabilities. After touring, you can customize your tour using the "Languages & Localization" settings. Navigation Navigation In AutoCAD, you can select any drawing object (point, line, polyline, polygon, arc, circle, spline, surface, text, or arrow), or a group of objects, by using the arrow keys on the keyboard. To navigate from one object to another, you can move the cursor by pressing one of the following key combinations: In a drawing, you can navigate in 2D by selecting one or more line segments (lines, arcs, ellipses, circles, and splines). AutoCAD supports the following modes of navigation: The methods of drawing lines The drawing view menu contains a "Draw Line" option. Entering a point or line segment Entering a point or line segment is similar to entering a character. Click the mouse on an empty space on the screen and move the cursor. Click the mouse again to enter the new point. Alternatively, you can select an existing line, polyline, or point (eg, using the spacebar), or select the line by using the right mouse button. A new line, polyline, or point is then created. The drawing view menu contains a "Line" option. Entering an arc Entering an arc is similar to entering an ellipse or a circle. Click the mouse on an empty space on the screen and move the cursor. Click the mouse again to enter the new arc. Alternatively, you

Select the pre-installation and choose "Autodesk Autocad 2013 Ultimate". Enter the activation key (8 digits) in the activation window. Select "I accept the license terms" button. Now download the License file (lac-license.dat). Rename the License file to "lac-license.dat" Log into the User Center. Click the "Import Files" button. Select "Import License File" and browse to the file you just downloaded (see image). Enter the License key and click "Import" to activate. How to use Create a project file in the Autocad. Start Autocad and select "File>New" Create a project file. It is recommended that you use "Transaction List" view for the project. Choose "Custom" and the "Transaction List" view is selected. "Transaction List" view allows you to customize the location of Transaction List, which is called "Transaction Items". If you have more than one transaction list in your project file, click "Transaction List" and drag it from the left side of the screen to the right. The Transaction List window will open up. Select the "Create New Transaction List" button This will open up another dialog box where you can name your transaction list. Enter a name and click "OK". Transactions are written in the transaction list in the sequence they were entered. To create a transaction, first click "Edit" and then click "Transaction" and enter a new transaction. To save a transaction and exit edit mode, click "Exit" To add a transaction, click "Insert" then drag the transaction you wish to add to transaction list into the transaction list box. To edit a transaction, double click the transaction in the transaction list. To create a new transaction, click "Edit" and then click "Transaction". To add or edit a comment on a transaction, click "Edit" and then click "Comment". To add a sub-transaction, click "Edit" and then click "Sub-Transaction". To add a comment, click "Edit" and then click "Comment". To add a line to a sub-transaction, click "Edit" and then click "Line". To add or edit a note, click "Edit" and then click "Note".
