## DTMF Tone Decoder Crack Free Registration Code For PC

This article describes the features and functionalities of the software: DTMF Tone Decoder. The software is designed to make audio diagnosis easier. DTMF Tone Decoder can be used to make diagnostic checks on the voice channel and the DTMF control channel. **DTMF Tone Decoder Features:** The DTMF Tone Decoder is a useful tool designed for the following purposes: analysis of audio files, DTMF decoding, and MP3 to WAV conversion. The software supports a spectrum analyzer, WAV recorder/player with built-in looping options, sine wave and white noise generator, oscilloscope, as well as a DTMF decoder with real-time results. **User Interface:** The DTMF Tone Decoder user interface has a simple layout with various panels that are represented by icons. The Windows Media Player is embedded as a default recorder/player, while a spectrum analyzer is supplied as an alternative. To make an audio file audible, press the Play button. To stop the selected audio file, press the Stop button. **Built-in WAV player and DTMF decoder:** When it comes to creating an audio file, pressing the Record button will make the default Windows Media Player available. The user interface has a simple menu, with the File button which you may use to save the selected audio file. You may check the remaining time, as well as the level indicator, and decide whether to make the file silent. You may also enter the playback speed. When it comes to DTMF decoding, press the Scan button and the software will launch a microphone, which will scan the DTMF tones. The software has a configurable matrix and a peak hold function that enables you to manipulate the frequency spectrum. Press the OK button to close the microphone. **Audio Spectrum:** A spectrum analyzer is supplied as a tool for analysing audio files. When you press the Analyzer button, the graph will be displayed and the spectrum will be frozen. To resume, press the Continue button. You can also select the peak of the spectrum, freeze the spectrum and select a marker. When you freeze the spectrum, you can select a threshold level. You may also run a sine wave generator and examine the spectrogram. A white noise generator is provided as a handy tool for testing the DTMF decoding. **Configuration settings:** The software has configuration options that enable you to define the DTMF decoding frequency matrix, the WAV form, the WAV
