Q: Where to find documentation about a good robust and optimal database design? It is quite difficult to find good database design guides. Most of them are more like a story of what they've done in the past than they are a guideline for the future. My question is simple: Where can I find a straightforward, good design guide for a SQLite database? I'm not asking for a

guide about how to design the actual schema. I would like a collection of basic principles that one can use when designing a database scheme and an outline of the general considerations that one should keep in mind. I was thinking about doing this as an answer, but hopefully there is already something written about it (maybe here on SO). A: There is not much and most are dated. However SQLite is a database about which there is a lot of

reading out there. SQLite
Tutorial (Very good) Apache's
wiki on how to write a SQLite
C/C++ program SQLite UDF
and Functions (How to write a
"user defined function") Also let
me add what "considers the best
design"? Test SQLite by yourself
Buy a good book (that depends
on what you do with the
database) I would recommend 1,
2 and 3. SQLite is not database,
it's an API (Application
Programming Interface) to

access SQLite databases, it has a fairly simplistic SQL to access databases in a easy way. SQLite will not make a good database (unless you know it from Oracle). It is optimized for applications that work with a database (WPF, C#, Ruby, Java,....). This is a very different task. A database exists to store data and is optimized for it. The use of SQLite as a database does not improve performance in any significant way. It does not make

one more "SQL-researcher". SQLite has a documentation. On Apache's wiki there is a link in the SQLite web site. SQLite will work fine as a database. Only it is not optimized for it. A: Writing a highly optimized database isn't possible. There isn't a language that can help you design the correct algorithm for the workload that you're using it for. That's why most performance guides for database products are "just do this" or

"something like that" or "we did something like

Archives for June 2007 The Bachmann-Strauss Foundation grants will enable the creation of multi-project partnerships that can leverage tax-exempt foundations and other sources of support to address community needs and concerns. The 2004 Post Election debacle and the

2006 Midterm elections have left many to question the effectiveness of the U.S. electoral process. “We have just finished an electoral reform project in the nation’s capital. I believe that both the Congressional and the Presidential elections need to be reformed,” says H.E. John R. White, Director of The Bachmann-Strauss Foundation. “H.E. White’s work with the Bachmann-Strauss Foundation is

enabling us to make a difference that touches many lives,” says Gheorghe Buda, J.D., chief executive officer of the International Organization of Good Governance. The Grammy Awards are coming up again, and this time the ceremony’s theme is the environment. The Bachmann-Strauss Foundation has earmarked a portion of its 2007-08 grants to green initiatives. All awards will require a minimum \$500,000

commitment in order for programs to qualify. The partners, the United Nations Foundation, and the Carnegie United States Trust, are funding the initiative. The United Nations Foundation raised the \$10 million in corporate, foundation and individual contributions required for the project. Carnegie United States Trust played a major role by serving as the fiscal sponsor for the project. The foundation's

2007-2008 grants awards are coming into place and more grantees are expected to emerge from its website by the end of July. The U.S. PIRG Education Fund has partnered with the Non-Partisan Voter Education Committee to provide voter guides to U.S. Senators and Representatives who are currently up for re-election. The guides can be used as formal policy documents, or a more informal way to provide voters

with the key issues of each candidate's record. The Bachmann-Strauss Foundation grants will enable the National Coalition for Hispanic Health to continue its work to ensure that all U.S. citizens have access to high-quality, affordable health insurance.

Q: How to exclude header files from the list of documents? My question is similar to this one, but I want to exclude header files from the document-based search in
