KEYMACRO is an extremely versatile, easy-to-use software for keyboard macro recording, and for both Windows and Linux. It supports such a wide range of functions that it can effectively replace the cumbersome tasks of keeping track of keyboard shortcuts and performing repetitive keyboard operations. Keyboard macros can be recorded using the standard keyboard shortcuts for any standard keyboard. KeyMACRO offers various features that allow you to configure keyboard shortcuts in such a way that they perform a number of operations at once, including moving text, inserting text, repeating a command, starting and stopping audio, converting text into the desired font, and inserting various graphics. KeyMACRO can also record such keyboard macros as "Play a sound", "Stop recording", "Clear

---

screen", "Select a file", "Save a file", "Choose a window", "Delete a file", "Restart the computer", "Create a new window", and more.

What's more, the software can automatically record and play back keyboard macros to any file or audio source and can be configured in such a way that you can save the results to text, JPEG, BMP, GIF, PCX, WMF, and even

Flash animation files. KeyMACRO also includes the following features: \* Automatic file opening with the specified command \* Scheduling of command execution \* Audio playback of a recording made with KeyMACRO \* Selection of file format for saving a recording \* Drag-and-drop of files and URLs \* Automatic macro saving on exit \* Editable macros, with unlimited number of macros \* Displays macros in any combination, including shortcuts, text, sounds, graphics, and URLs \* Supports Win, Mac, and Linux
